FUND2740
HIGH IMPACT FOUNDATION

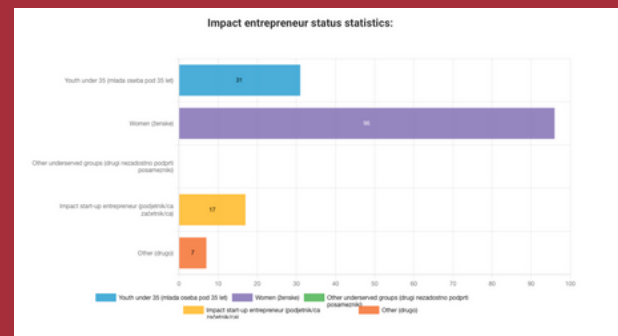

actimpact
initiative

With grant support from

ActImpAct 2021-2024

The ActImpAct project was implemented in Slovenia under the auspices of [Google.org](https://www.google.org) from December 2021 to January 2024. 150 underserved beneficiaries, primarily women, graduated from the program, and 105 beneficiaries ended the program with their impact venture, tackling various SDG-related society challenges.

Additional ActImpAct program activities and impact:

- Finalisation of the impact design methodology for maximisation of products, services and activities' positive impacts
- FUND2740 pledge to the European Commission to mainstream impact into 500 ventures and organisations
- Recommendations for policy-making changes and participation in the European Social Economy Monitor - ESEM program
- Detection of gaps in the use of AI tools and their development
- Joining the SEWF network and People and Planet First Certification scheme
- Initiating the WISH – World Impact Sales Hub
- Establishment of the ActImpAct Initiative – AIAI

IMPACT ENTREPRENEURSHIP

With grant support from

ActImpAct Initiative 2025-2027

The AIAI - ActImpAct Initiative offers impact tools to strengthen local, national, and international social and impact ventures, prioritising support for underserved individuals. AIAI works with support organisations and development stakeholders to maximise and balance positive impacts on people, the planet, and profit. AIAI offers different membership types for easier access to support services and tools, including BULK packages for support organisations.

OUR BESTSELLERS:

IMPACT DESIGN

Impact design is a systemic design and methodological production method for creating high-impact products, services, and activities. It results in practical solutions for society's challenges while scaling the innovativeness and competitiveness of developed products and services. Simple impact design was developed for micro-impact ventures, and scoring tests were prepared for the impact assessment of your business model.

AI F IE

AI f IE - Artificial intelligence for Impact

Entrepreneurship offers AI tools to maximise the positive impact of social and impact entrepreneurship activities. Our AI tools have several advantages, including a straightforward, structured process, easy use, pre-set questions, specialisation of tools, and an extensive internal AI knowledge database. Additional useful digital tools for your impact venture have been added.
